

Your Lens Into the  
Entire Cryptoeconomy

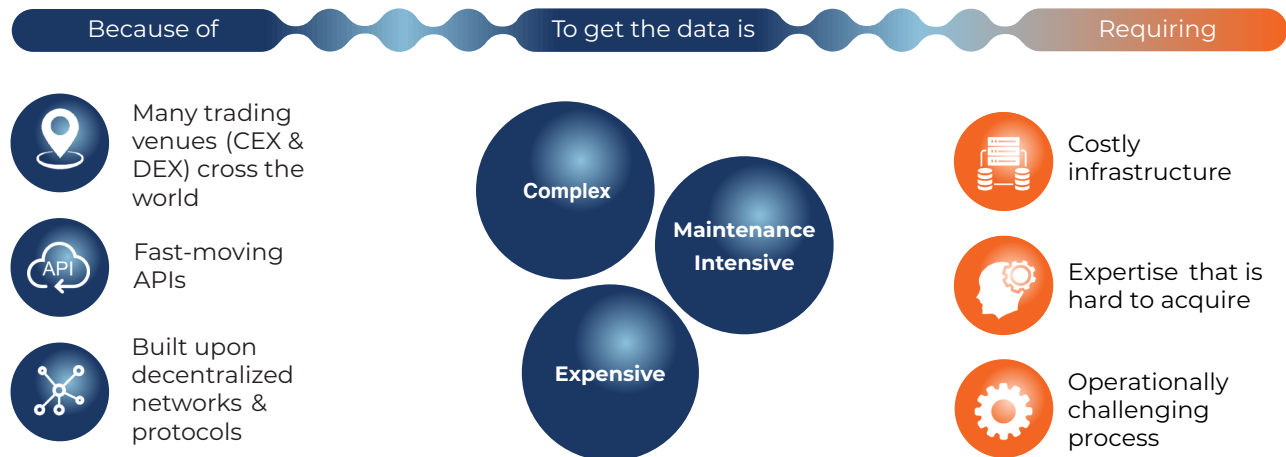

# Our Mission

At Amberdata, our mission is to define and lead the market for digital asset data, market intelligence and research applications to provide our customers with a trusted lens into the entire cryptoeconomy.

We deliver comprehensive data and insights into blockchain networks, crypto markets, and decentralized finance, empowering financial institutions with historical and real-time fundamental (on-chain) and market data for research, trading, risk, analytics, reporting, and compliance. We eliminate the infrastructure setup, integration challenges and maintenance headaches to access digital asset data, reducing cost and time to market for entering the digital asset class.

## The Problem We Solve

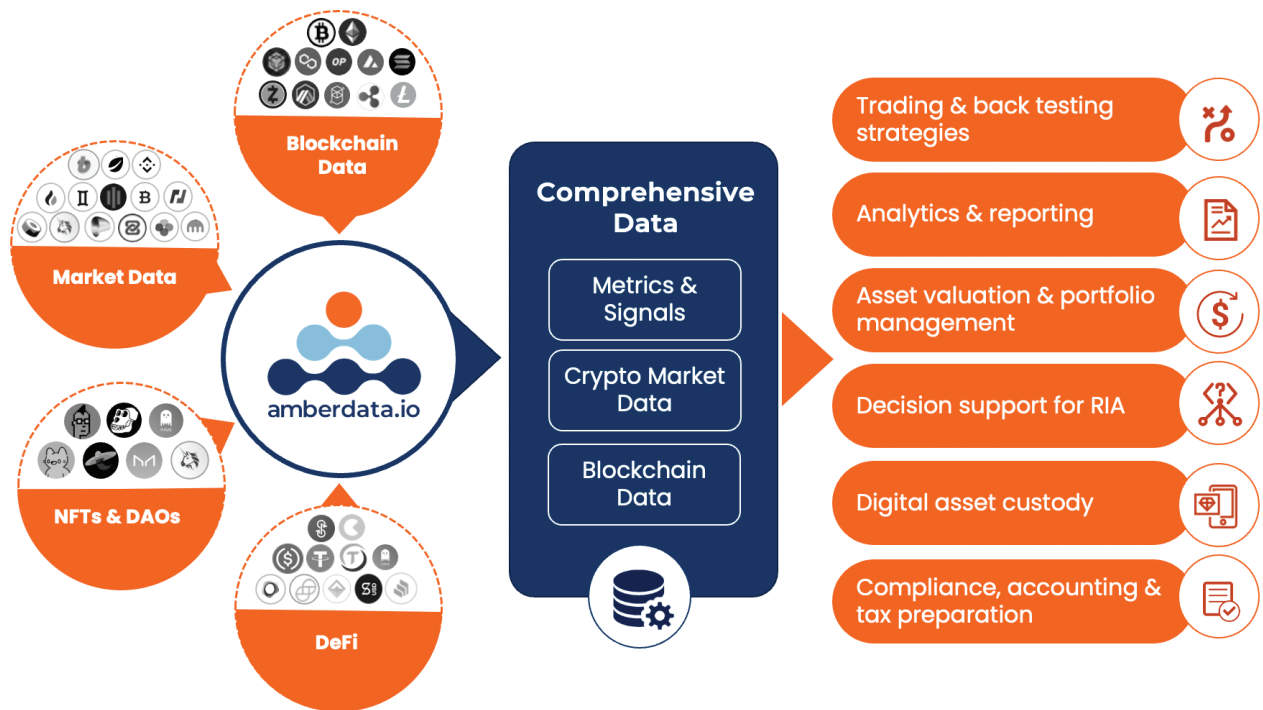

Financial institutions need reliable data infrastructure to offer digital asset products and services, but it's very difficult to build and maintain.

*"Amberdata has a unique approach and an extensive offering that transforms complex data into easy-to-use information. They have been great partners to collaborate with and helped us to utilize data much faster than expected."*

Itay Tuchman | Global Head of Foreign Exchange at Citi

# Our Platform

## Why Amberdata

We have built and maintain an institutional grade infrastructure to deliver digital asset data so that financial institutions can concentrate on their core business.
