UNRIVALED ACCESS TO REAL-TIME AND HISTORICAL DATA ACROSS GLOBAL CENTRALIZED CRYPTO MARKETS

Amberdata's Enterprise Market Data is built for institutional performance—trusted by trading desks, quant funds, asset managers, regulators, and corporate treasuries. We provide the depth, speed, and reliability you need to power trading strategies, run risk models, conduct compliance investigations, and manage portfolios in today's fast-moving digital asset markets.

With the deepest historical order book data in the industry, normalized across major exchanges and streamed via low-latency infrastructure, Amberdata sets the gold standard for crypto market data.

Citi · GSR · Bitwise® · Deribit · Moody's · PANTERA

NOMURA · LedgerX · GALAXY DIGITAL · QCP Capital · Infotrend

GET THE EDGE WITH THE INDUSTRY'S MOST COMPREHENSIVE MARKET DATA PLATFORM

SPOT | OPTIONS | FUTURES

USE CASES

TRADING & EXECUTION
Power low-latency execution strategies with real-time liquidity and trade data

RISK & PORTFOLIO MANAGEMENT
Monitor exposure across markets and instrument types and develop risk models

ASSET MANAGEMENT
Use scalable data infrastructure for back-testing & quantitative analysis

MARKET SURVEILLANCE
Track abnormal trading activity and compare reference prices and historical trades for reporting integrity

TREASURY & WEALTH MANAGEMENT
Use normalized pricing and historical benchmarks for valuations and monitor digital asset holdings

REGULATIONS & POLICY
Monitor volatility and cross-venue trading behavior and analyze price manipulation patterns

VERSATILE DATA DELIVERY FOR EVERY USE CASE

REST API
Deep history in a scalable API

WEBSOCKETS
Real-time event streaming

AWS S3
Bulk downloads with petabyte-scale support

SNOWFLAKE & DATABRICKS
Query with SQL on/cloudbased platforms

WHO WE ARE

Amberdata powers the future of financial services, providing the essential digital asset financial infrastructure that enables institutions to navigate, analyze, and capitalize on the digital asset economy. Our institutional-grade solutions connect disparate markets and data sources with the robustness, granularity, and scalability required to power end-to-end use cases effectively.

As the backbone of digital asset intelligence, we have pioneered institutional-grade tools and support organizations with comprehensive, real-time, and historical data solutions that seamlessly integrate into existing workflows. Our unparalleled expertise and industry-leading products enable our customers to unlock opportunities, manage risk, and drive innovation in an increasingly complex and interconnected financial landscape.

DRIVING PRODUCT INNOVATION TO POWER THE FUTURE OF FINANCIAL SERVICES
